

Second Journée Darwin

Chimie ParisTech

May 11, 2012, 9h30

Amphithéâtre Friedel

The "Journées Darwin" are a series of meetings aimed at bringing together researchers in the Parisian basin working on biological evolution.

Each "Journée" consists in a small number of seminars, in which the speakers are expected to explain the philosophy and the perspectives motivating their research, focusing on long-range goals rather than on immediate results.

The goal is to help in establishing connections among researchers interested in different aspects of biological evolution, working on different systems and in different laboratories.

Speakers:

Minus van Baalen

(Ecologie et Évolution - Université Pierre et Marie Curie)

Chris Bowler

(Biologie - École Normale Supérieure)

Nicolas Desprat

(Biophysique - École Normale Supérieure)

Amaury Lambert

(Probabilité et Modèles Aléatoires - Université Pierre et Marie Curie)

Olivier Tenailleon

(Écologie et Évolution des Microorganismes - Faculté de Médecine Bichat)

Registration: <https://sites.google.com/site/journeedarwin/>

Organisers:

Luca Peliti (University "Federico II" Naples)

Aleksandra Walczak (CNRS / École Normale Supérieure)

Marco Cosentino Lagomarsino (CNRS / Université Pierre et Marie Curie)

Hervé Isambert (CNRS / Institut Curie)

The "Journées" are generously hosted by the Institut Henri Poincaré.
